## Professional Summary

Computer Science and Engineering undergraduate specializing in Data Science with hands-on experience developing LLM-powered applications, intelligent workflows and backend-integrated AI systems. Skilled in building end-to-end solutions with a focus on reliability, privacy, structured responses, rapid prototyping and real-world problem-solving.

## Education

- **UPES, Dehradun** — **Aug 2023 - May 2027**
  Bachelor of Technology (B.Tech.) in Computer Science and Engineering — **CGPA:7.74 /10**
- **Vidya Bharati Chinmaya Vidyalaya, Jamshedpur | Jharkhand** — **Apr 2022 – May 2023**
  Class XII CBSE Board — **81.6%**
- **Taurian World School, Ranchi| Jharkhand** — **Apr 2020 – May 2021**
  Class X CBSE Board — **93%**

## Skills

- **Programming Languages:** Java, Python, JavaScript
- **Frameworks:** NodeJS, ReactJS, StreamLit , HTML5 , CSS3 , FASTAPI
- **Database:** MySQL, MongoDB
- **Tools & Technologies:** Git, GitHub, Generative AI, Machine Learning, Natural Language Processing, Power BI , Docker, RAG Pipelines

## Work Experience

**Software Developer Intern** — **Jun – Jul 2025**
**Innovixa Services Private Ltd., Jamshedpur**

- Collaborated with the development team to build a facial recognition-based employee attendance system.
- Implemented real-time face detection, identity verification and automated check-in/check-out tracking.
- Integrated attendance records with a centralized database and admin dashboard for monitoring and reporting.

**Software Engineering Intern – AI & Data Analytics** — **Jun – Jul 2026**
**Tata Steel, Jamshedpur**

- Developed a chatbot to answer natural-language queries related to industrial machine and IoT data.
- Integrated Snowflake with the backend for secure and accurate retrieval of machine performance data.
- Implemented query validation and response-handling mechanisms to improve accuracy and reliability.

## Projects

**SEO Website Analyzer**
**Technologies: Node.js, Express.js, JavaScript, HTML, CSS, SQLite (sql.js), Axios, Puppeteer, Cheerio**

- Built a full-stack SEO auditing platform to analyze website content, technical SEO, and keyword optimization.
- Developed a weighted **SEO scoring** engine with keyword relevance analysis and actionable recommendations.
- Developed secure authentication, scan history, and PDF export features using a modular backend architecture.

**Password Strength Analyzer Suite**
**Technologies: Python, Flask, Local LLM, SSE Streaming**

- Combined rule-based analysis, Shannon entropy, and zxcvbn into a unified offline password assessment suite.
- Implemented Server-Sent Events to stream brute-force time estimates, reducing perceived UI latency by 50%.
- Integrated a local LLM with llama-cpp-python for private password diagnostics without external APIs.

**Facial Emotion Detection System**
**Technologies: Python, OpenCV, Keras, CNN, MobileNetV2**

- Developed a real-time facial emotion detection system using OpenCV and a trained Keras classification model.
- Built a custom CNN for grayscale inputs and evaluated MobileNetV2 transfer learning for emotion classification.
- Applied image preprocessing and frame averaging to improve the stability and reliability of live webcam predictions

## Certifications & Achievements

- **Head, Documentation Team** – **Avishkarnam**, **UPES**: Led documentation and coordination for national-level literary events.
- Represented the **University** & **SOCS football team** in various intra and inter-college football tournaments.
- **Associate Secretary – NSS UPES: Led and coordinated impactful social service initiatives and community drives.**
- **Oracle Cloud Infrastructure 2025 Certified Generative AI Professional** certification from Oracle University.
- **Microsoft Certified**: Azure Database Administrator Associate (**DP-300**) certification from Microsoft.
